Track Description:

Our race track has a very smooth and fast layout resulting in lap times around 12 and 13 seconds on 1/8 and 1/10 IC track cars, respectively.

Technical data of the track:

- Length: 210 m
- Width: 4.0 m
- Grain: 0.8

The cars are driven in clockwise direction. The long straight is followed by a banked curve. The pit lane is directly in front of the rostrum.

Detailed outline of the track:

Drivers' pits:

The pits can comprise 72 drivers. The pits are completely roofed and have a stone floor; additionally, they are wind protected by wooden walls in south, west and north direction. Every table is equipped with a highly plain tabletop, an additional shelf space above, and, of course, enough 230V AC power sockets (German "Schuko", compatible with the Europlug CEE 7/16) for every driver.

In order to track the current heat every row of tables is equipped with a monitor displaying the current race data. There is enough electric light in the pits to allow drivers to service and prepare the cars even after sundown. If the number of drivers exceeds 72, we will establish a big tent with a solid wooden floor, many windows, plain tables and enough AC power plugs for everyone.

Directly at the race track there are a lot of parking slots. The area for camping has place for 35 caravans/campervans. It is possible to provide 230V AC power to every caravan/campervan.

There are permanent sanitary facilities including shower rooms in a separate brick building directly at the track.

For those who do not like to camp at the race track there are many rooms available in Türkheim itself, but also in Bad Wörishofen which is only 6 km away.

On race events at our race club, we will also provide a full gastronomic service rich in variety for the whole event directly at the track.

Nevertheless, there is also a gastronomic service on training weekends including a variety of beverages and warm meals.
